Yes, totally do-able with Dr. B.  
And maybe I can get some Cellscape samples as well for delivery since it's on my way to Stanford.

She would like to go with the smaller, purer sample using the syringe method. 2cc to 5cc the syringe method. I believe Dr. B is in Fresno tomorrow and can procure this. The question would be can they take it Fedex overnight??? Or because its Dr. B and it will be fast and furious in Fresno and A LOT of appts, we send Jessica to Fresno with Holly and she can leave midday with the sample to deliver to Stanford.
